Availability: 6 x 300ml

HYDRAULIC VALVE LIFTERS TREATMENT

USES

The special **BARDAHL Hydraulic Valve Lifters Treatment** is a complementary synthetic lubricant compatible with all types of oil and any type of fuel and diesel engines, common rail and high pressure, particle filters and catalytic converters.

INSTRUCTIONS FOR USE

Pour the bottle content in engine oil when changing oil or afterwards.

A bottle treats 6 liters of oil.

PROPERTIES

The special **BARDAHL Hydraulic Valve Lifters Treatment** :

- Dissolves and eliminates deposits in the oil channels of the hydraulic valve lifters.
- Reduces engine and 'clicking' noise when cold starting.
- Forms an anti-wear film to protect valve lifters, valve stems and heads.
- Extends the lifespan of the engine.
- Treatment to be made with every oil change.
- Recommended by main car manufacturers.
