

ENGINE FLUSH

USE:

BARDAHL ENGINE FLUSH has been designed to clean the whole lubrication system of fuel, diesel or LPG engines with or without turbo. It is miscible in all types of 4 stroke mineral, semi-synthetic and synthetic monograde or multigrade oils.

PROPERTIES:

Thanks to **BARDAHL ENGINE FLUSH** mud and particles are dissolved into used oil and eliminated during the oil change.

The **engine is cleaner** and the original quality of oil is longer preserved.

BARDAHL ENGINE FLUSH also reduces pollution and makes your engine last longer. It has excellent lubrication properties.

Not harmful for catalytic converters and recommended by all important car manufacturers.

INSTRUCTIONS FOR USE:

Before the oil change : Turn on the engine, pour bottle into crankcase (the product should fill between 10 and 15 % of the crankcase capacity). Drive about 200km or let the engine run for 15 minutes without driving. Then **change imperatively oil and oil filter**. Add new oil.

CAUTION:

Before use, read carefully safety instructions on packaging or on safety data sheet.
