

Lubricating penetrating oil

USE:

BARDAHL Penetrating Oil is an extremely fluid, transparent liquid with powerful penetrating properties. It is specifically useful for repair and maintenance operations on cars, motorbikes, motorized gardening devices, water-sport equipment, agricultural machinery, do-it-yourself activities and many other household applications. It allows the easy dismantling of mechanical parts that are too tightly bolted together or corroded by rust.

INSTRUCTIONS FOR USE:

Shake can thoroughly before use. Use the extension to apply. Let the product soak in for 5 to 10 minutes and then release the assembly. Can be used in an inverted position.

PROPERTIES:

BARDAHL Penetrating Oil :

- Releases mechanical assembling.
- Softens oxidized and dried grease.
- Penetrates and dissolves rust.
- Leaves a lubricating film.
- Protects from corrosion.
- Assists with easy dismantling.

Thanks to its exceptional fluidity and its penetrative power, it can ingress easily between seized surfaces or porous oxides.

Physical and chemical characteristics :

Viscosity at 40°C mm²/sec D445 10

Flash point °C D92 65

Pour point °C D97 -30

CAUTION:

Read the safety instructions on packaging or safety data before use.
