

TURBO PROTECT

BARDAHL TURBO PROTECT treatment prevents the specific problems of new generation and latest technology engines (Turbo, Common Rail, Injection, High pressure injection,...)

BARDAHL TURBO PROTECT has the following properties:

- 1/ Lubricates and protects turbo and engine when cold starting.
- 2/ Lubricates and protects turbo and engine when the oil level is too low.
- 3/ Is suitable for old and new petrol or diesel engine.

We recommend to pour product directly into engine oil when changing oil or in between oil changes.
Suitable for all types of engines (diesel, petrol, LPG) and oils.
Compatible with catalytic converters.

PROPERTIES:

BARDAHL TURBO PROTECT contains a unique formula made of FULLERENE molecules, that protects and covers with an unbreakable, anti-friction and pressure resistant film all turbo and engine metal parts.

This protection film has the following properties:

- 1/ Lubricates and protects turbo and engine when cold starting and when driving under extreme conditions.
- 2/ Lubricates and protects turbo and engine when the oil level is too low.
- 3/ Protects turbo and engine against oil oxidation.
- 4/ Thickens the oil film at high temperature without changing the oil quality and viscosity.

Does not clog the oil filter.
Active for 10,000 miles.

INSTRUCTIONS FOR USE :

Pour contents into engine oil when changing oil or in between two oil changes.

- 1 can treats up to 6 litres of oil
