

BARDAHL HIGH SPEED CHAIN

BARDAHL High Speed Chain is a high adhesiveness lubricant, developed to protect and lubricate all types of chains including the self-lubricating ones (O-Ring).

Its exclusive **BARDAHL POLAR PLUS Formula**, together with very high adhesiveness components, enables the lubricant to remain constantly stuck to mechanical parts, thus ensuring an efficient lubrication all the time, much better over traditional lubricants. Especially developed for strongly stressed chains that work at very high rotation rates.

ADVANTAGES

- Powerful lubricating action and EP properties (Extreme Pressure)
- High adhesiveness to chain links
- Extends lives of chain, ring gear and pinion gear
- Superior anti-wear, anti-rust and anti-corrosion power

Resistant against the water washing-away action
